Röchling

Röchling Industrial Oepping (formerly Röchling LERIPA Papertech) draws on decades of know-how. The production and processing of high-performance plastics, including the widely known material Robalon®, has been successfully developed and continuously improved at the Oepping (Austria) site since 1961. The multitude of production possibilities with modern machinery enables Röchling to offer a broad range of products and materials.

IN DETAIL

The goal is to better plan your needs so that you receive your products quickly and reliably.

WHAT DOES THIS MEAN FOR YOU AS A CUSTOMER:

- Processing of orders / requirements takes place via Hans Hall GmbH
- We maintain close cooperation with Röchling to help with technical queries or developments.
- In case of individual inquiries, Röchling accompanies the project and decides on a case-by-case basis whether direct handling or via Hans Hall is more suitable.

HANS HALL
PREMIUM TRACKS AND COMPONENTS

Röchling

Oepping (AT) / Weingarten, January 2022.

Hans Hall GmbH enters into a strategic alliance with the Alpine division of Röchling Industrial Oepping (Robalon®) – to the benefit of customers and both companies.

Extreme temperatures and countless hours of operation: Machines and equipment in alpine use have to withstand enormous loads every day. At the same time, snow groomers, cable cars and gondolas are getting bigger and bigger. This can demand heroic efforts from the users during maintenance. After all, weather fluctuations, weight or wear and tear must not be allowed to reduce efficiency. It is therefore all the more important that all installed parts can be relied on – such as the high-performance plastic Robalon® from Röchling Industrial Oepping and the track parts from Hans Hall.

The plastics from Röchling Industrial Oepping (formerly Leripa) have long since established themselves in the field of ropeways and snow groomers and have been confirmed many times over. Hans Hall GmbH is equally well known in the industry. Focused on piste machines for 44 years already, the Weingarten-based company has made a name for itself through highly specialized know-how, flexibility and solution-oriented services.

For both Röchling Industrial Oepping and Hans Hall, quality, durability, and an always customer-oriented price-performance ratio are top priority. The two companies have therefore decided to join forces for the future: As of March 1, 2022, Hans Hall will take over the sales of Röchling Industrial in the Alpine industry. Both companies have been partners for a long time, are bring their knowledge and experience even closer together.

STATEMENT RÖCHLING INDUSTRIAL

“Customer satisfaction, personal contacts and individual options are our ultimate goal – and to achieve this goal in the best possible way, we have combined our strengths, with the strengths of our long-standing partner Hans Hall GmbH.”

STATEMENT HANS HALL

“The company Röchling Industrial Oepping convinced us immediately with their entry into the winter sports sector,” explains owner Hans Hall. “We have used Robalon® material from Röchling for our tracks from the very beginning. The excellent quality and customer satisfaction has confirmed our decision time and again. So it was only logical for us to now go one step further in our cooperation with Röchling Industrial.”

Both companies are convinced that their customers will quickly benefit from the new cooperation. The bundling of forces improves delivery readiness of the products and the range of products will be expanded. With our stocking of Röchling products, Hans Hall can provide quicker delivery due to closer proximity to the customer. With locations in Weingarten for Austria and Germany, in Rothenthurm for Switzerland and in Salt Lake City for the USA and Canada we can offer fast access to all products, the company assures. Hans Hall's field service teams, worldwide trading partners and a web store further optimize service. Customers can count on advice and easy ordering as well as the usual good price-performance ratio.
